New Technology and Design is the Deciding Factor...

3 SPRING DESIGN

Why Choose the ESCO 22 Ton Service Jack?

The 22 Ton ESCO Professional Air Hydraulic Service Jack MODEL 10390 is designed to meet and exceed expectations of a quality jack at a competitive market value. Unlike competitive jacks, the Model 10390 is 100% air up and air down, and is designed/manufactured based on years of research and reengineering.

The 3-Spring Design allows for much more controlled ascending and descending of the cylinder. Cylinder casing has been redesigned, along with the cylinder, to decrease the ability for debris to get into the cylinder/air motor and damage the jack. Redesigned Air Pneumatic design allows for the jack to ascend with air and descend with air. No more manual descending of the jack. 3-Spring design also better stabilizes the cylinder which prevents unnecessary movement of the cylinder while lifting the vehicle.

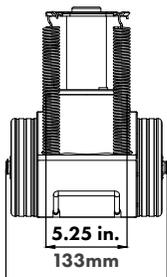

Product Specifications:

22 TON CAPACITY

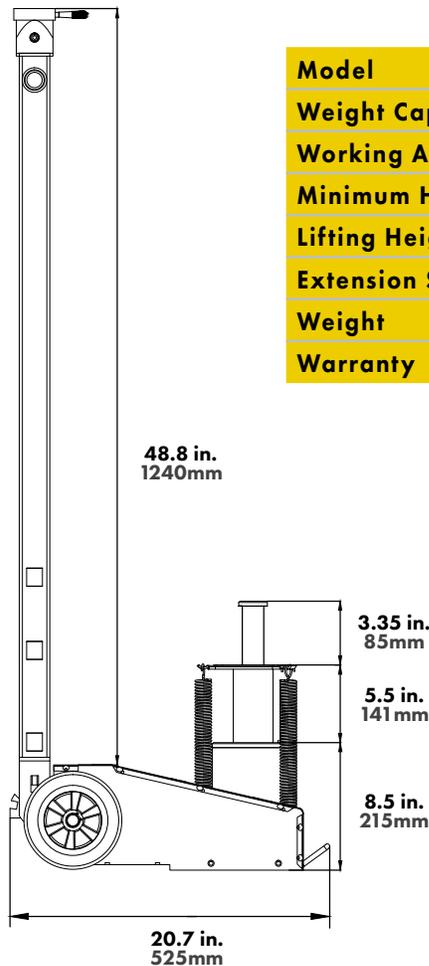

EXTENSIONS

0.75 in. - 2 in. - 4 in.
20mm - 50mm - 100mm

10.5 in.
625mm

Model	10390	
Weight Capacity	44000 lbs.	20000 kg
Working Air Pressure	116-174 psi	8-12 BAR
Minimum Height	8.5 in.	215mm
Lifting Height	5.5 in.	141 mm
Extension Screw	3.35 in.	85mm
Weight	66 lbs.	30 kg
Warranty	1-Year	

- ▶ Maximum Lifting Height of 21.35 in.
- ▶ 3-Position Handle - Handle goes to full 90 degree angle for optimal positioning of jack.
