ADAS & YOU

ADDING THE ADAS ADVANTAGE TO YOUR SHOP

What is ADAS? Almost all vehicle accidents are caused by human error, which can be avoided with Advanced Driver Assistance Systems (ADAS). The role of ADAS is to prevent deaths and injuries by reducing the number of car accidents and the serious impact of those that cannot be avoided.

Essential ADAS Applications Include:

- PEDESTRIAN DETECTION/AVOIDANCE
- LANE DEPARTURE WARNING/CORRECTION
- AUTOMATIC EMERGENCY BRAKING
- BLIND SPOT DETECTION

These lifesaving systems are key to ensuring the success of ADAS applications, incorporating the latest interface standards and running multiple vision-based algorithms to support real-time multimedia, vision co-processing, and sensor fusion subsystems.

SMART GROWTH WHY YOU NEED TO OFFER ADAS SERVICES

The growth of the ADAS Market can be attributed to the increasing adoption of ADAS systems by OEMs for product differentiation and the ever increasing issue of road safety.

As repairing ADAS-equipped vehicles becomes more of a necessity, turn to Autel, the industry leader for state-of-the-art Calibration Frames, Diagnostic Tablets, Software, and ADAS Targets.

The ADAS Market is expected to reach USD 74.9 Billion by 2030, growing at a Compound Annual Growth Rate (CAGR) of 11.9% during the forecast period.
