

# 72080 TUFFBAR

## Tuffbar

- Tuffbar's entire top surface is covered with tough protective polymer plates so there is NO contact between the metal bar and the rim.
- Greater length for more leverage.
- Forged steel makes Tuffbar stronger than standard bars.
- Perfect for mounting low profile tires on large wide diameter alloy rims without bending.
- Use Tuffbar with existing rim clamp machines the same way as your regular bar.
- The replaceable polymer plates are secure, NO BOOT to shift position or fall into the tire.

Item Number	Description
