

HYDRAULIC RAMS - Single Acting Cylinders

model(s) 10301 | 10302 | 10303 | 10304 | 10305 | 10306 | 10310

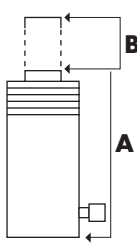

HYDRAULIC CYLINDERS/RAMS are essential for tire dealers and technicians servicing earthmover tires, especially when space behind the wheel limits bead breaker use. **Made in the USA** with globally sourced parts, these cylinders are backed by an extended **3-year warranty** and rigorously tested to 125% of their rated capacities for reliability.

- Rugged, high quality rams/cylinders designed for use in lifting and pushing.
- Aluminum bronze bearings - reduce wear caused by off-center loads.
- Solid steel cylinder design - increases durability.
- Chrome plated piston - resistant to wear and corrosion.

Removable rubber boots protect collar threads during transport and storage.

Fitted with 3/8 in. NPTF female half couplers.

It is recommended to only use **80%** of the stroke of cylinders & rams to maximize the products performance, safety, and lifespan.

COMPLIES WITH ANSI/ASME B30.1 SAFETY STANDARDS
