Specifications:

MODEL 10459

The **ESCO 22 Ton EZ-Wheel Jack Stands [Pair] (MODEL 10459)** are designed to support loads of up to 22 tons (44,000 lbs. per stand), making it ideal for a variety of industrial applications, including construction, semi-truck service/fleet, material handling, and any maintenance garage. The ESCO EZ-Wheel Jack Stands are equipped with two large transport wheels, as well as an extended handle, making it easy to maneuver and transport to different locations. Once in position, the handle can be removed with ease, allowing for greater flexibility in tight spaces. Each stand also includes a locking pin for added safety and security. The lifting column is easy to position and adjust, with three different axle height positions to choose from. Additionally, the stand features a locking pin holder to prevent loss and a 1/4 inch thick solid steel base plate for added stability. With a one-year warranty included, the **ESCO 22 Ton EZ-Wheel Jack Stands** are a reliable and versatile solution for heavy-duty lifting and support needs.

REMOVABLE HANDLE

Designed to be able to be positioned safely under the load with a 49 inch detachable handle.

EZ-WHEEL JACK STANDS

are equipped with two large heavy-duty transport wheels and an extended handle for easy manoeuvrability, allowing for effortless transportation to and from any location, with the added convenience of being able to remove the handle as needed for storage.
