Evacuation Foot Pump

JDI-FP1

This Foot Pump transfers used oil and other nonflammable fluids from low-profile oil drains into a waste containment system. Perfect for shops who handle multiple types of fluids without using a diaphragm pump for transferring fluids, this foot pump siphons fluids from a variety of drain styles.

Kit includes:

- 6' suction hose, 1" diameter
- Ideal for use with JDI-17PLP
- 8' discharge hose with J-Hook
- Constructed of durable polypropylene
- Approximately 8 strokes per gallon
