High Precision Tire Balancing

Here's one way to trim the weight out of your operations. With magnum+ High Precision Balancing Beads, you can simplify your process, speed up your daily routine and turn a time-consuming repetitive task into a genuine profit center. It's just the simplest, easiest, most-cost effective way to balance tires for their entire life. Now that's efficiency.

Internal Balancing Changes The Game

- Automatic balancing in less than 5 seconds.
- Lasts for the entire life of the tire.
- Continuously adapts to the new heavy spots that form around the tire.
- Turns balancing into a hassle-free profit center.
- No balancing equipment or maintenance required.

magnum+ Changes The Game

- The largest, most even, roundest and long-lasting beads on the market.¹
- The lowest vibration vs. speed ratio.¹
- Proven to never affect tire structure or wheel assembly.²
- The only internal balancing compound in the world that passed the load/speed endurance test according to ECE-R54.²
- TPMS compatible

1. According to a 2020 performance report outlining results from tests and analysis made by Dr. Alexander Wölfel.

2. According to a 2020 performance report outlining results from tests made in Germany by world renowned automotive certification company.
