10 Tons of Power in a Long-Frame Floor Jack

The RFJ-10TL 10-Ton long-frame garage floor jack is designed especially for extreme heavy-duty lifting. It is perfect for servicing truck fleets, buses, farm equipment, heavy construction equipment and other vehicles that require access to very low areas. The RFJ-10TL features a foot-operated pump for quicker lifting efficiency, automatic overload safety valve and swivel casters for easy maneuvering around tight spaces.

Anyone putting the RFJ-10TL to service is likely to be lifting extremely heavy vehicles. If you're not careful, you could exceed its 10-ton capacity. That's where Ranger's built-in overload protection comes into play. If the floor jack is overloaded, it will gently lower to the ground, keeping you and your vehicle safe in the process. 10 tons is a lot of weight, so our engineers have over-engineered this jack to make sure it can handle that weight capacity like it's nothing at all.

Features

- 20,000 lb. lifting capacity
- Alloy-plated ram
- Swivel casters for easy mobility
- Built-in safety overload system
- Designed for heavy use
- Pump handle can be locked in 3 different towing positions
- Additional foot pedal control provides quick setup and rise

Specifications

Lifting Capacity	20,000 lbs. (9,072 kg)
Lowered Height	7" (176 mm)
Raised Height	23" (584 mm)
Front Width	13" (330 mm)
Rear Width	18" (457 mm)
Chassis Length	61" (1,549 mm)
Shipping Weight	479 lbs. (217 kg)
Shipping Dimensions	64" x 20" x 12" (1,626 mm x 508 mm x 305 mm)
