

# Heavy Duty Bottle Jack with Gauge

Model: ZNP-10P / ZNP-20P

Capacity: 10 Ton / 20 Ton

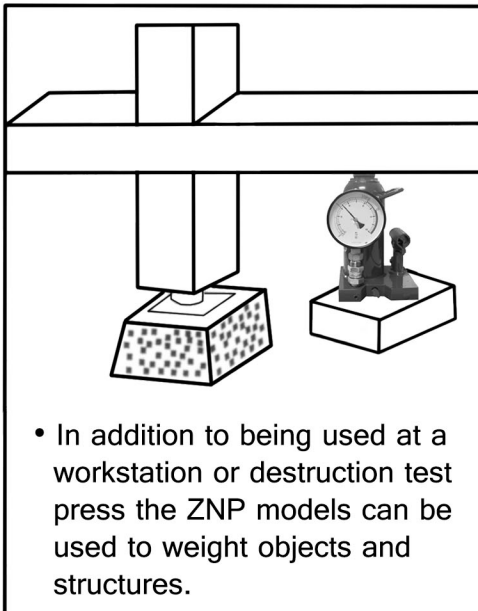

ZNP-20P

## Usage:

Designed to distinctly display the force output by the jack on a large 4" gauge. Easy to read and monitor force output.

## Special Features:

1. Welded construction throughout reduces metal fatigue resulting in longer tool life.
2. Thick steel base ensures provides excellent stability and strength.
3. Special plating and heat treatment on ram, extension screw and pump plunger provide up to three times the corrosion resistance of standard chrome plating.
4. Casting, cylinder and base are joined using an electric welding method for high strength and leak prevention.
5. Needle style release valve provides controlled pressure release.
6. Safety valve device protects the hydraulic system from overload damage.
7. Large 4" gauge provides accurate force reading in Metric Tons.
8. All ZNP units are completely rebuildable and repairable.

- In addition to being used at a workstation or destruction test press the ZNP models can be used to weight objects and structures.

- Special Heavy Duty Industrial plating and heat treatment provide a darker color ram, extension screw and pump plunger that resists corrosion up to three times that of traditional chrome plating.

ZNP-10P

Model Number	Capacity (Ton)	Min. Height (in)	Max. Height (in)	Ram Lift (in)	Screw Ext. (in)	Saddle Diameter (in)	Base Area (in)	Weight (lbs)
ZNP-10P	10	9.45	18.50	5.90	3.15	1.73 x 1.85	5.90 x 5.51	24
ZNP-20P	20	10.63	16.93	6.30	---	Ø 2.05	6.37 x 6.00	36
