

ZINKO

Electric Pump

Model: ZPE-37SR-1L

Capacity: 37 ton

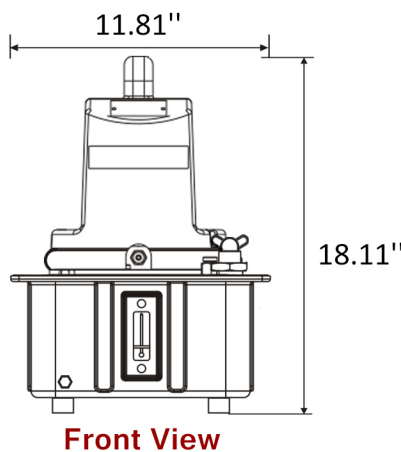

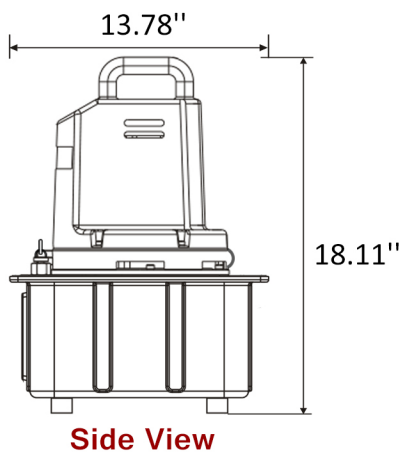

Usage:

Our ZPE Series electric pumps are designed for a large number of different applications where lifting, pushing, bending, or holding may be required. Ideal for general industry, electric installations, construction industry, ship yards, material handling, etc.

Special Features:

1. Economical 10,000 psi electric powered hydraulic pump.
2. Large capacity 1.6 gallon oil reservoir allows pump to power many different sized cylinders.
3. Simple manual valve allows a controlled solution when releasing pressure.
4. 0.5 hp 115V electric motor provides quick lifting and simple connection to standard power outlets.
5. Die mold plastic motor case provides simple carrying handle and protection for the electric motor inside.
6. Steel oil reservoir provides durability for the unit.
7. Hand control pendant with a 10 ft. cord allows operator to start pump from many different safe positions.
8. Utilizes a brushless electric motor for high duty cycle and limited maintenance.

Model Number	Motor (HP/Voltage)	Max Pressure (psi)	Pressure (psi)		Flow Rate (in ³)		Reservoir (in ³)	Max Sound (dBA)	Weight (lbs)
			1 st Stage	2 nd Stage	1 st Stage	2 nd Stage	Size		
ZPE-37SR-1L	0.5 / 115V	10,000	200	10,000	244	24.4	370	90	53
